

THE ROYAL HOTEL

ENVIRONMENTAL POLICY

The Royal Hotel is situated within the picturesque coastal town of Ventnor. The Hotel grounds plays host to a variety of wildlife including Wall Lizards (*Podarcis muralis*) and the rare Glanville Fritillary (*Melitaea cinxia*). The sub tropical gardens are planted with many species of beautiful and exotic plants and feature an exceptional pink climbing Mountain Geranium. The hotel plays a major role in island tourism and we believe it is important to protect and enhance our environment. To this end we are committed to the follow course of actions:

- To comply with relevant legal environmental legislation and requirements
- To minimise our use of energy, water and other materials of scarce supply
- To cultivate a work ethic with a high level of awareness of waste minimisation and recycling
- To source produce from Island suppliers subject to availability, quality and commercial viability
- To promote the recycling waste products such as composting our food waste
- To provide all employees with training and resources in order to meet our environmental objectives
- To educate and inform staff and guests about our environmental objectives
- To maintain hotel equipment such as boilers and heating systems to ensure efficiency
- To maintain a continuous commitment to improved environmental practices
- To monitor our environmental performance on a yearly basis
- To support the Island Youth Trust and their youth community work
